

Creating press-ready PDF from Quark 6

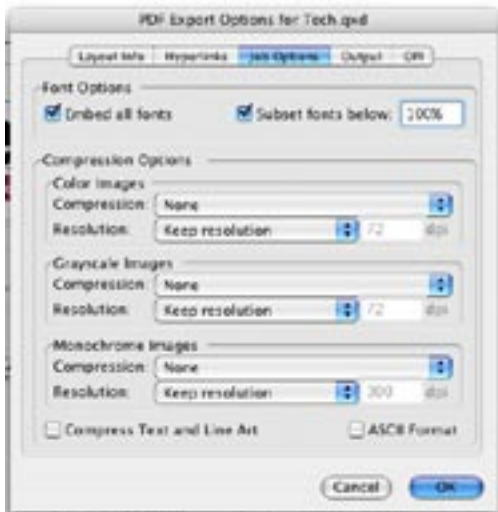

- 1) Select Export Layout as PDF

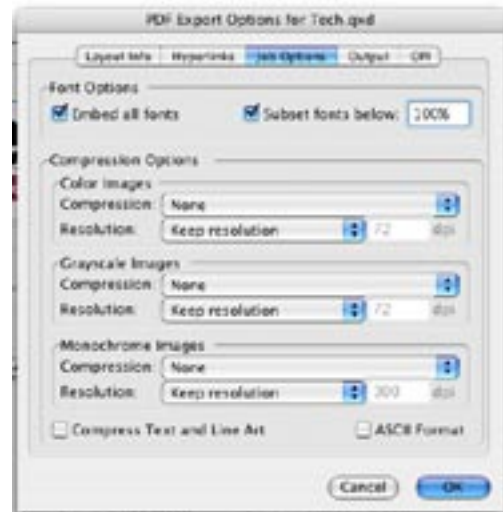

- 2) Find your target folder, put in the appropriate page number, then click "Options"

- 3) Click on the JobOptions tab and set it up as per “3 joboptions.jpg” below
- embed all fonts
 - subset all fonts
 - maintain your image resolution

- 4) Click on the Output tab and follow “4 output.jpg”
- composite CMYK
 - centred registration at 18 pt
 - symmetric bleed at 0.25”

- 5) Click on the OPI tag and make sure that the “OPI Active” option is DE-selected.

- 6) Click “OK”, make sure the file is properly named, then click “Save”
